Introduction

A comparatively rare opportunity in this locality to acquire a single block of predominantly arable land including a small farmyard area, a single grassfield and a spinney.

Location

The land is located to the northwest of the village of Buckworth, which is approximately 9 miles west of Huntingdon and 4 miles west of the A1. Access to the farm is via a single track leading from the Buckworth to Old Weston road.

Description

The farm comprises eight fields, a small farmyard area with concrete pad (35 m x 15 m approx) and the remains of two small derelict sheds

The land slopes gently down from south to north lying between the 30 m and 50 m contours. It is classified Grade 3 on the former MAFF Land Classification Map and is referred to as being of Jurassic and Cretaceous clay geology by the Soil Survey of England and Wales.

The purchaser will be encouraged (but not obliged) to continue with this scheme.
